

A division of Micro Auto Group

Since 1991, **Micro Plastics (formerly called Micro RIM)** has specialized in class-A paintable plastic molding of prototype and production parts. With our heritage in the automotive collision bumper replacement business, we know what it takes to build products that meet demanding specifications. Today, Micro Plastics is proud to be the only USA owned aftermarket bumper manufacturer in the country. But Micro Plastics is more than just automotive; we help customers create tomorrow's plastic products. When you choose Micro Plastics for your molding needs, you're partnering with a professional plastic injection molder that can save you time, and money. We're here to handle your complete molding job from start to finish, including painting, packaging, and shipping.

Industries Served: Automotive, Industrial, Agriculture, Medical, Consumer Goods, and more.
